

# Things That Grow

This half term, children will be learning all about growth. They will read a range of books about plants and seeds, discussing how things grow. Using a range of gardening tools, children will plant different seeds and observe what happens to them over time. We will plant sunflower seeds and see which flower grows the tallest. Children will look closely at different flowers, naming the parts and creating some flower inspired artwork.

# Fairy Tales

Children will continue to read a selection of fairy tales and be encouraged to retell them through role play and by playing with small world toys. We will identify and explore the colour and textures of a range of fruit and vegetables and talk about the importance of a healthy diet.

# Spring

Children will learn about special events that take place during Spring, including Easter and Mother's Day. They will talk about what happens in Spring and compare to other seasons of the year. Children will decorate eggs and have fun finding eggs around the school grounds.
